EXPERIENCE

Salesforce & Automation Developer

Dec. 2025 - Present

Sivan Windows and Doors | Northridge, CA

Window and Door Dealership

- Designed, developed, and deployed custom Salesforce solutions using Apex, Lightning Web Components (LWC), Flow Builder, and JavaScript to automate business processes and improve operational efficiency across the organization.
- Architected and built company-wide Salesforce dashboards, reports, and automated workflows that provided leadership and employees with real-time visibility into sales performance, lead pipelines, and operational KPIs.
- Engineered a Python-based AI lead outreach platform integrated with Salesforce APIs and Agentforce workflows, automating customer engagement and contributing to a 3× increase in qualified leads through intelligent outreach and follow-up automation.
- Partnered with sales, operations, and executive stakeholders to translate business requirements into scalable Salesforce solutions, improving lead management, customer engagement, and internal business processes.
- Administered and optimized the Salesforce platform, including user management, security, permission sets, custom objects, validation rules, reports, dashboards, data quality initiatives, and workflow automation.
- Developed scalable Salesforce integrations and automation using REST APIs, Apex, and Python to streamline data synchronization and eliminate manual processes across business systems.
- Provided ongoing platform enhancements, troubleshooting, user training, and performance optimization while ensuring Salesforce best practices and long-term system scalability.

Software Developer

Jan. 2024 – Dec. 2025

Se&S Healthcare Consulting | Los Angeles, CA

Healthcare Consulting LLC

- Architected and developed a custom Electronic Medical Records (EMR) platform from the ground up using React.js, JavaScript, Python, Firebase, HTML/CSS, and REST APIs to manage patient records, scheduling, clinical documentation, and post-operative care workflows.
- Designed, configured, and implemented the organization's Salesforce environment from scratch, including custom objects, page layouts, reports, dashboards, Flow automations, security settings, user roles, and CRM processes tailored to healthcare operations.
- Developed responsive frontend applications using React.js and reusable component architecture, delivering scalable user interfaces for patient management, scheduling, insurance verification, and clinical workflows.
- Engineered backend services and REST API integrations using Python and Firebase to support secure data processing, authentication, real-time synchronization, and communication between healthcare systems.
- Integrated third-party healthcare platforms, including Tebra and Office Ally, to automate insurance eligibility verification, claims processing, patient referrals, and billing workflows.
- Designed and optimized Firestore database architecture, security rules, and cloud-based data models to improve application performance, scalability, and secure handling of patient information.
- Collaborated directly with physicians, nurses, billing specialists, and business stakeholders to gather requirements and deliver technical solutions that streamlined clinical operations and administrative workflows.
- Built workflow automation, reporting dashboards, and operational analytics using Salesforce, Python, and web technologies to improve visibility into patient care, referrals, scheduling, and insurance claims.

Database Administrator

May. 2019 – Dec. 2023

Expert Travel Associates | Encino, CA

Travel Agency

- Managed and streamlined sales and expense data using QuickBooks Online, Microsoft Excel, and Power BI for real-time financial insights and reporting
- Created detailed financial dashboards in Power BI to visualize trends in revenue, costs, and profitability
- Organized client and sales records using Salesforce CRM, enhancing lead tracking and improving customer relationship management
- Transformed legacy budget reports into structured Excel datasets, enabling accurate forecasting and historical analysis
- Automated the download and organization of airline booking data via TRAMS software, optimizing internal database processes for faster access and review

Front-End & Back-End Developer

Jun. 2020 - Aug. 2022

Traform Inc. | San Francisco, CA

Cloud-Based Travel Management Company

- Built scalable backend services using Python and the Flask framework to streamline code reusability and reduce development time
- Integrated SQL and MongoDB databases to store and manage structured and unstructured user data for booking and travel records
- Developed a clean, responsive UI using React.js, improving user experience and engagement across devices
- Connected Global Distribution System (GDS) APIs using XML and JSON to enable real-time flight and hotel search capabilities
- Collaborated with owners to design and deliver a full-stack web platform for modern travel management workflows

EDUCATION

California State University, Northridge | *Bachelor of Science in Electrical and Computer Engineering*

Relevant Coursework: Microprocessor Systems, Probabilities for Engineers

Focus: C++, Python, MATLAB

California Polytechnic St. University, San Luis Obispo | *Computer Engineering Coursework*

Relevant Coursework: Introduction to Data Science, Object Oriented Programming, Fundamentals of Computer Science

Focus: Python, SQL, C++, Java

CERTIFICATIONS

- Salesforce Certified Platform Developer I (Expected 2026)
- Salesforce Certified Administrator
- Salesforce Certified Platform App Builder
- HarvardX Data Science Professional Certificate

SKILLS

Programming Languages:

Python, JavaScript, Apex, SQL, C++, C#, Java, R

Web & Frameworks:

React.js, Node.js, Flask, HTML5, CSS3, Salesforce Lightning Web Components (LWC)

Salesforce:

Salesforce CRM, Apex, Lightning Web Components (LWC), Flow Builder, SOQL, Agentforce, Reports & Dashboards, Custom Objects, Validation Rules, Permission Sets

Databases:

Firestore, MongoDB, SQL

Cloud & Tools:

Firebase, Git/GitHub, Power BI, Microsoft Excel, QuickBooks Online

Other:

REST API Integration, Workflow Automation, Dashboard Development, Data Modeling, System Integration, Agile Development
